

DESIGN SUPPLY LIMITED

Set up in 1991, Design Supply Limited was originally dedicated to supplying drawing office products to the Architectural and Design markets. The changing printing environment, however, was seen as a major opportunity, and since 2001 the company has been repositioning itself, and specialising in the provision of wide format printing solutions to a diverse customer base.

Design Supply is now a Value Added Reseller for Hewlett-Packard, a Roland partner, a Pro Focus dealer for Epson and an authorised large format reseller for Canon, and it has a customer base of 2,200, 1500 square feet of warehousing, 1500 square feet of office space and a turnover of £4 million.

Design Supply has also become a major player in the UK's large format inkjet market, particularly in the graphics and signage sectors.

"Over the past six to eight months the large format market has gone through the roof, right across the board," says Alistair Wright, the company's Marketing Director. "We have had a particular increase in enquiries from professional photographers and signage companies, who are realising what wide format printers can offer them, and many have been astonished at the quality of the output that they are capable of, and how much they can now get for their money."

In the photography market some users are still coming to terms with what digital printing can offer them, and are slightly nervous about investing in a field that can seem a little high-tech and daunting, Design Supply have made the decision to offer a total solution if required. This ensures that anyone who comes to them will be guaranteed to get the set up that best suits their personal circumstances. If the customer is not totally satisfied with the goods, or the solution that has been supplied, at any time up to 14 days after installation or delivery, the cost of goods will be refunded against the purchase of any Design Supply product of equal or greater value.

"We talk to everyone who contacts us at length to make sure that we know what it is that they are hoping to achieve," says Alistair. "We ask a lot of questions and ultimately this helps us to select the printer that is right for the client for their market be it graphics, signage, photography or architectural and design. We can also supply a full range of media from all the top manufacturers, and we can set everything up and have it running at our clients premises, so that they can be confident that everything has been done right, and that they will get the very best results possible."

The purchase will also be totally supported by Design Supply, and where possible any faults will be diagnosed and repaired remotely. If the fault can't be rectified immediately, then a technician will be on site within an average of four working hours during normal Monday to Friday working hours (dependant on the type of service contract purchased).

Supplies for SOLVENT OPAQUE FILMS

DISPLAY FILM

Product Description	Product Code	Product Reference	Per Roll*
PVC Display non-reflective, glare-free matt surface film is a highly opaque, scratch-resistant film for aqueous printing that's ideal for medium-term displays for up to 12 months. The instantly-dry, microporous coating ensures brilliant colour reproduction and fast production of indoor displays that don't need laminating.	DS97002986	DS PVC 220µ Display Film Matt 914mm x 20m	£69.78
	DS97002987	DS PVC 220µ Display Film Matt 1067mm x 20m	£259.59
A perfect choice for: Roll-up displays, Display stands, Exhibition panels, Posters, POP signage. Good opacity is achieved without the need for a grey back-coating making it an economical alternative to polyethylene films.
